Caring for your Toys

- How should I look after my toys?

Silicone is a highly durable material but we do have some tips on how to look after your toy.

Keep your silicone toys away from other toys made from cheaper materials (Vinyl, PVC) as these can leach chemicals onto your silicone and have adverse reactions

Clean your toys after every use to avoid bacteria build up on the surface of your toy

Keep your toys away from sharp objects, once silicone is cut or sliced it is prone to tearing

Try to keep your silicone toys out from under any heavy weights as this can effect the shape of your toy over time
