

Associated Course Details

Name: Toy Cleaning

ID: 070403012

Area of Focus / Skillset: Toys

Supplies

- Mild soap for initial cleaning
- Clean, Dry Towels
- UV Unit

Tips / Notes / Warnings

UV units are unlikely to remove scents absorbed by the toy.

UV units have size limitations and may not work for larger toys used by many fisters.

Extended exposure to UV radiation will degrade most anything over time, including toys. Cheaper toys will discolor and show aging faster than more expensive, silicone toys.

Steps / Procedures

To disinfect any toy with UV radiation:

1. Wash toy thoroughly using soap and water to remove any lube and debris from the play session.
2. Dry completely.
3. Insert toy into fully enclosed UV unit.
4. Follow timer instructions provided by unit manufacturer (typically 15 minutes).
